How I build products *for real people.*

Constraints aren't limitations — they're innovation catalysts. In markets where every tap costs data and every second matters, simplicity isn't optional.

01 — Start with Access

If users can't reach it, it doesn't exist. Every product begins with the question: how do we get this into their hands with zero friction? Design for the 70% on 2G/3G, not the 30% with fibre.

02 — Design for Friction

Every interaction costs data, time, and trust. Friction is data. Every drop-off is a brief. Build flows that survive USSD, IVR, and one-bar reception.

03 — Measure Behavior

In low-trust markets, actions speak louder than surveys. MAU is vanity; session depth, stickiness and retention curves are the real scoreboard.

*"Building for **constraints** creates **scale**."*

LOW BANDWIDTH · LOW LITERACY · MULTI-CHANNEL · HIGH
IMPACT

Pakistan's first telco-integrated multilingual AI assistant (Urdu, Punjabi, Sindhi, Pashto, English) via USSD (*6131#), SMS, IVR, Web, App, and MZA — 6 access channels. Designed for feature phone users (60% of market) with voice-first, low-literacy UX.

1.3M+ web users

128K+ queries

6 channels

13.6% peak stickiness

ROLE

Full lifecycle — multilingual training data curation, 6-channel telco integration, voice-first UX, daily reporting across 6 live dashboards, telco billing & CRM coordination.

OzGPT — Multilingual AI for Feature Phones

Pakistan's first telco AI assistant across 6 channels and 5 languages. Built for the 60% of users who don't have smartphones.

1.32M

128K+

AI QUERIES · WEB + APP

13.6%

PEAK STICKINESS

My Role

- Multi-channel accessibility (USSD, SMS, IVR, Web, App, MZA)
- Curated multilingual datasets for Urdu, Punjabi, Sindhi, Pashto, English
- Telco billing & CRM integration coordination
- Daily reporting across 6 live channel dashboards
- Voice-first UX design for zero-literacy users

Key Decisions

- **USSD first (*6131#):** Launched before Play Store — 62K peak daily users
- **Regional fine-tuning:** LLM adapted for local dialects, not just translation
- **IVR → SMS fallback:** Zero query drop-off architecture
- **Data pack bundles:** Integrated with Zong daily/weekly plans
- **6-channel distribution:** Web + App + USSD + IVR + SMS + MZA

GLOBAL RELEVANCE

Multilingual, low-bandwidth AI distribution reaches 2.8B+ non-English speakers. The 6-channel architecture is directly replicable in MENA, Africa, and LATAM — proving AI doesn't require a smartphone.

Premium Pakistani OTT with original series & celebrity content. 716K MAU, 9m46s avg session time. Sustained 3–3.5% stickiness in a fragmented OTT market through content strategy, iOS launch, and cohort retention.

716K MAU

9m46s avg session

3–3.5% stickiness

Core revenue product

ROLE

Post-handover ownership — stabilized roadmap with no feature regression, led iOS launch unlocking higher-ARPU segment, expanded content beyond dramas (Deikhomentary, Legal Lens, Buzz@), engagement cohort tracking.

Deikho — *Sustaining Engagement at Scale*

716K MAU and 9m46s average sessions — maintained through content strategy, iOS launch, and cohort retention in a fragmented market.

716K

MAU

9m46s

AVG SESSION

3-3.5%

SUSTAINED STICKINESS

My Role

- Stabilized roadmap & backlog post-handover with no feature regression
- Led iOS launch — unlocking the higher-ARPU user segment
- Expanded content beyond dramas: Deikhomentary, Legal Lens, Buzz@
- Engagement cohort tracking & at-risk user identification
- Weekly QA including trailer, slider, and reel testing

Key Decisions

- **Original content:** Deikhomentary & Legal Lens differentiated from drama-only rivals
- **Adaptive bitrate:** Tuned for Pakistan's 3G/4G variability
- **Pattern-based push:** OneSignal campaigns timed to individual viewing habits
- **iOS first:** Premium segment prioritised before mass Android rollout

GLOBAL RELEVANCE

Balancing content investment with technical performance in bandwidth-constrained markets. Adaptive optimization and cohort retention apply to any emerging-economy OTT — from MENA to Sub-Saharan Africa.

OTT/VOD with 40+ live channels. Engagement grew from 2m5s to 2m39s avg sessions (↑27%). Roadmap includes Comedy Corner and Whatsin integration for consolidated content strategy.

450K MAU

↑27% sessions

40+ live channels

ROLE

Content strategy, feature prioritization, platform upgrades, cross-product consolidation planning with Comedy Corner.

Short-form video & community platform — Pakistan's answer to local UGC. 15–19% stickiness (3–5x industry average), 33–46m average sessions, <5MB install size optimized for low-storage emerging market devices.

15.8% stickiness

34m sessions

<5MB install

ROLE

Content delivery architecture, creator onboarding flow, discovery mechanics, 15-min auto-approval pipeline, retention cohort tracking.

Qabeelah — *Depth Over Scale*

Community video platform with 15–19% stickiness — 3–5x the industry average — and 33–46 minute average sessions.

15–19%

STICKINESS

33–46m

AVG SESSION

<5MB

INSTALL SIZE

My Role

- Creator onboarding flow and discovery mechanics
- Prioritized session depth over raw DAU in all product decisions
- Lightweight video delivery engineering oversight
- Retention cohort tracking and weekly analysis
- 15-min auto-approval pipeline to reduce creator friction

Key Decisions

- **Engagement over acquisition:** Optimized for 30m+ sessions from day one
- **Creator-first tools:** Minimized the upload and editing barrier
- **Community signals:** Weighted shares and comments over passive views
- **<5MB app:** Designed for low-storage emerging market devices
- **3-per-row layout:** Maximized community discovery surface area

GLOBAL RELEVANCE

Product-market fit isn't about size — it's about depth. The auto-approval pipeline and creator-first design are directly replicable for UGC platforms in any emerging market.

Reimagined lifestyle OTT — fashion, food, fitness & entertainment content. Launched iOS with DCB (Direct Carrier Billing) integration complete. Dual content pipeline with Whatsin on the roadmap.

iOS launched

DCB integrated

ROLE

Repositioning, content enrichment, performance optimization, cross-product pipeline coordination.

trendin.com.pk

Play Store

App Store

Lifestyle OTT — content management, UI improvements & technical development. Roadmap includes dual content pipeline with Trendin and a possible merge for consolidated lifestyle vertical.

ROLE Content strategy, UX improvements, development oversight, cross-product roadmap planning.

Hybrid OTT with live TV channels and curated video content — combining linear TV experience with on-demand discovery.

ROLE

Content strategy, UX updates, cross-functional ops coordination across content, dev and analytics.

Delivering The Best Comedy Content

Niche comedy OTT with stand-up, sketches & light entertainment. Roadmap: merge with ZongTV for consolidated content strategy and unified comedy + OTT positioning.

ROLE End-to-end content & operations management, merger planning with ZongTV.

HTML5 gaming platform — instant-play games requiring no install, optimized for low-end devices. 250K+ MAU with 4m15s average engagement.

250K MAU

4m15s avg

ROLE Platform ops, UI/UX improvements, client coordination with Jazz, game library curation.

IO Game Play Land

Partner · Jazz

GAMING

Instant-play HTML5 games. Fastest-growing gaming product in portfolio. Curated for short session, high-frequency gameplay on emerging-market handsets.

Fastest growth

ROLE Post-handover ops, game curation, UX optimization, weekly performance tracking.

gameplayland.com.pk

Ufone's HTML5 gaming platform. 44K MAU with 8.5% stickiness — strong engagement for a niche telco gaming vertical.

44K MAU

8.5% stickiness

ROLE

End-to-end launch strategy, feature design, operations and telco bundle coordination.

Cloud-native storage with secure multi-device sync (iOS, Android, Web). Optimized for budget devices with limited storage. DCB billing fully live; MinIO bucket migration in progress for scale.

3 platforms

DCB live

MinIO migration

ROLE

Sync architecture coordination for intermittent 3G, lightweight upload flow for low-end handsets, cross-platform release coordination, DCB payment scoping, storage optimization.

Portall — *Solving Storage Anxiety*

Cloud storage for budget device users with limited memory and inconsistent connectivity.
Infrastructure migrating from S3 to MinIO for scale — with DCB billing fully live.

3

IOS · ANDROID · WEB

MinIO

INFRA MIGRATION

DCB

BILLING INTEGRATED

My Role

- Sync architecture design for intermittent 3G connectivity
- Lightweight upload flow for low-end handsets
- Cross-platform release coordination (iOS, Android, Web)
- DCB payment process scoping and implementation
- MinIO bucket migration coordination for storage scale

Key Decisions

- **Offline-first sync:** Queue locally, push when connected — no data loss
- **Smart compression:** Auto-optimize media size before upload
- **Device health prompts:** Proactive nudge when storage drops below 15%
- **Bundled pricing:** Integrated with Jazz data packs for zero-friction upsell
- **DB separation:** App DB decoupled from infra for resilience

GLOBAL RELEVANCE

Storage anxiety affects 1B+ budget smartphone users. Offline-first sync and data-cost awareness are essential for cloud products in Africa, South Asia, and LATAM.

I3 Digital Signage

Partner · Jazz Business

ENTERPRISE

Enterprise content management for multi-screen broadcasting. B2B roadmap with SaveMart and Serena Hotels as target enterprise accounts.

B2B

ROLE Requirements gathering, dev coordination, enterprise testing, B2B sales enablement.

Enterprise Only · Jazz Business

Mobile Akhbaar

MEDIA · UFONE

Digital news aggregation — real-time updates across politics, sports, entertainment & technology, packaged for Ufone subscribers.

ROLE

Development launch, content strategy, platform ops and telco distribution.

Real data from a *live product*.

Metrics tracked across 6 distribution channels — Sep 10 to Nov 26, 2025.

Channel Performance

OzGPT reaches users across 6 distinct channels — a deliberate distribution strategy built for Pakistan's fragmented device ecosystem.

AI Feature Usage

How I manage 15 products at once.

Simultaneous ownership of 15 live products requires structured ops. Here's the system — drawn from weekly tracking across QA, Dev, Content, and Client dimensions.

QA FRAMEWORK

Standard + Rotating Testing

Every product runs on one of two tracks. Standard testing covers routine flows (sub/unsub, content posters, sliders). Rotating tests surface issues that standard testing misses — pushed-content edge cases, episode sliders, OTP flows across Jazz/Zong/Telenor numbers.

Sub/Unsub flows

OTP verification

Content posters

Trailer QA

ROADMAP PRIORITIES

Strategic Consolidation & Growth

Documented cross-product consolidation: Comedy Corner → ZongTV merger, Whatsin + Trendin dual content pipeline, Digital Signage B2B push, and Portall MinIO infrastructure migration. Prioritization tracked against Fire / Ongoing / Waiting queues.

Comedy + ZongTV merge

AI pipeline

B2B Signage

OTT consolidation

Tracked Roadmap Opportunities

PRODUCT	OPPORTUNITY	CATEGORY	STATUS
Comedy Corner	Merge with ZongTV for unified comedy + OTT strategy	OTT	MERGE
Deikho	New content verticals; explore AI-powered features	OTT / AI	ACTIVE
Portall	Feature additions + MinIO infrastructure migration	Enterprise	ACTIVE
ZongTV	Integration of Comedy Corner + new platform channels	OTT	ROADMAP
Qabeelah	Positioning as Pakistan's dedicated local UGC platform	OTT / UGC	GROW
Whatsin	Dual content pipeline with Trendin; merge consideration	OTT	MERGE
Digital Signage	B2B expansion — SaveMart, Serena, enterprise accounts	Enterprise	B2B PUSH
OzGPT	Voice AI Bot RFQ with Zong; scale multilingual dataset	AI	ACTIVE

Product & Analytics Toolkit

Analytics & Data

- Google Analytics — cohort & funnel
- Mixpanel — event tracking
- Firebase — crash & A/B testing
- SQL — dashboards & queries
- OneSignal — push campaigns

Project Management

- Jira — sprint & backlog
- Roadmapping — quarterly planning
- A/B Testing — experiment design
- Agile/Scrum delivery
- Weekly cross-product ops tracking

Marketing & Growth

- Google Ads — acquisition
- TikTok Ads — Gen Z UA
- Social Media — organic growth
- Telco bundle integrations
- Retention strategy

Design & UX

- Figma — prototyping
- Low-literacy UX design
- Rapid wireframing
- Stakeholder demos
- Adobe Suite
